

MERCURY ADHESIVES PRESENTS

“Mercury Moments”

MERCURY IS THE EXCLUSIVE
ADHESIVE SPONSOR OF SEFF

"At the recent Southeast Electric Flight Festival (SEFF) late in the afternoon before I was to fly a demo in front of over 1000 pilots and spectators I was involved in an accidental mid air rendering my plane, ... well ... as you can see, kind of un-flyable. Mercury Adhesives came to the rescue and using the High Performance M100XF I was able to build not one but two new planes and fly in the noon time demos for the next two days.

Thanks to Mercury for the high quality USA made products."

Capt. Chris Jewett

THE ONLY CA
MANUFACTURED IN
THE USA!

To Mercury, “Made in the USA”, is a statement of freshness and trust. Mercury does not play games by repackaging, blending or thickening foreign products in order to hang on to a false USA statement. Mercury products are actually **MANUFACTURED IN THE USA** and we love to prove it. Check out the Mercury web site for a video tour of our plant and remember...freshness matters!
